## MANUFACTURED IN ACCORDANCE WITH ASTM STANDARDS

### CODING SYSTEM FOR DADO TRUNKING

D P - 0

**D : Decoduct**

**P : Perimeter trunking with profile number code as suffix**

**e.g.**

**P1 : BCB** (Bevelled top lid, centre lid, bevelled bottom lid)

**P2 : BCA** (Bevelled top lid, centre lid, angle bottom lid)

**P3 : ACB** (Angle top lid, centre lid, bevelled bottom lid)

**P4 : ACA** (Angle top lid, centre lid, angle bottom lid)

**- : Accessory code, if any**

**e.g. : BU1 - Base Unit for Profile P1**

**BL1 - Bevelled Lid for Profile P1**

**FT2 - Flat Tee for Profile P2**

**IB3 - Internal Bend (set) for Profile P3**

**EC3 - End Cap (set) for Profile P3**

**0 : Size code as in catalogue**

**e.g. :**

**0 : 160 mm x 50 mm**

**Other sizes available on request**

## CERTIFICATE OF REGISTRATION

CERTIFICATION SCHEME FOR  
QUALITY MANAGEMENT SYSTEMS

This is to certify that  
**Interplast Company Limited**  
Electrical Accessories Section

has been satisfactorily assessed by ASTA BEAB Certification Services against the requirements of  
**ISO 9001:2000**

The certificate holder is granted right of entry into the ASTA BEAB register of quality assessed firms in respect of products and services defined below or in the attached endorsement, as the case may be. The certificate holder may also use the ASTA BEAB quality symbol below in accordance with the regulations governing the use of the symbol and the information provided by the holder of this certificate and in respect only of the scope defined herein.

Certificate No.  
Client Reference  
Applicable Scope  
Original Issue Date  
Expiry Date  
Applicable to

13255  
LQ-352

The design and production of electrical wiring accessories.  
December 1997  
30<sup>th</sup> November 2010  
Industrial Area 2, P.O. Box 4679, Sharjah, United Arab Emirates

Conditions (this certificate is valid until the date shown above)

Intertek

## Certificate of Registration

The following organisation's quality management system has been assessed and registered by Intertek Systems Certification as conforming to the requirements of  
**ISO 9001:2008**

Certificate Number  
14221  
Initial Certification  
March 2000  
Certificate Issue Date  
17 June 2008  
Certificate Expiry Date  
28 February 2012

The certificate is subject to the organisation maintaining their system in compliance with the regulations stated in this certificate, allowing regular assessments and following the detailed requirements of the assessment body.

AMTAC Certification Services Limited is an accredited body registered under UKAS with the identification number 061.

In the absence of this certificate, AMTAC assumes no liability for any party other than the Client and their only in accordance with the agreed Terms and Conditions.

Decorative

## SKIRTING TRUNKING SYSTEMS

- 3 compartment mini skirting trunking suitable for commercial and domestic use.
- An unobtrusive and aesthetically designed system.
- Three compartments segregate power, data and communication cabling.
- Purpose designed accessory box adaptor, which overlaps the trunking allowing tolerance for onsite cutting.
- High Impact resistant and sleek system designed as a neat and economical skirting.
- Choice of custom decorative designs (eg. Wood Burl, Wood Grain and Marble) and other colours are available. Ask for design and colour database.

## CABLE MANAGEMENT SYSTEMS

### Perimeter Systems - DADO Trunking

Decoduct PVC Perimeter (DADO) Trunking is a new, large capacity Cable Management System for use in modern offices, hospitals, laboratories or workshops, and is ideal for both new building projects and refurbishments.

#### Salient features of this system include:

- Individual compartment lids for safety and ease of access, with easy clip on features.
- End caps with easy clip on features
- Self aligning Couplers
- External bends featuring internal segregators which offer greater retention and alignment of fitting

Decoduct PVC Perimeter (DADO) Trunking is available in a wide range of decorative finishes in addition to the standard white colour, hence the whole system can be colour coordinated to blend with the interior design/environment

Fabricated DADO Trunking Accessories such as Angles & Tees are under development, and when ready would complete the system and meet the total project requirements of the contractor.

## CABLE MANAGEMENT SYSTEMS

### Mini Trunking System

No more than 45% of the inside space of mini trunking should be occupied by cables. The table below gives the cross-sectional areas of various cables and the maximum number of cables that can be laid in each size of Decoduct mini trunking. If cables of different sizes are to be used, the sum of their nominal cross-sectional areas must be calculated, and then a trunking size with equal or higher filling factor must be selected without exceeding the stipulated space factor of 45%.

Cable Size (mm <sup>2</sup> )	Normal Overall Cross Sectional Area(mm <sup>2</sup> )	Decoduct Mini Trunking Size References					
		DMT 0	DMT 1	DMT 2	DMT 3	DMT 4	DMT 5
		45% Filling Factor(mm <sup>2</sup> )					
		19	68	119	199	336	496
Single core cables		Maximum number of cables					
1.0	6.6		10	18	30	50	
1.5	7.6		8	15	26	44	
2.5	9.6		7	12	20	35

## CABLE MANAGEMENT SYSTEMS

### Mini Trunking Systems

#### Safety

To ensure safety in use, the installation should be undertaken by competent personnel and in accordance with relevant codes of practice and statutory requirements. Information on proper installation can be found in:

- Regulations, British Standards specifications and codes of practice
- Regulations for Electrical equipment of buildings (IEE publication)

#### Description

Decoduct mini trunking consists of a body, and a clip-on lid which is fitted to the body by pressing it along its front face. The lid can be easily removed by lifting it from the body at one end and then peeling it away. The lid has an easy closing mechanism which is designed to give a securely closed installation, yet is easily accessible for maintenance or modifications.

#### Fixing

Holes should be drilled on the base of the body to mechanically fix to the desired surface using flat head screws. Fixing centres should not be more than 40cm apart, or more than 15cm away from the end of a straight run. On appropriate surfaces, the trunking can also be fixed by using a suitable contact adhesive. Alternatively DECODUCT trunking can be installed on clean dry surfaces.

#### Jointing

A fine toothed tenon saw and mitre block should be used to cut the trunking, to provide a neat installation. In all straight joints, it is important to stagger the joints of the trunking body and lid to give better protection and reduce joint visibility. On long straight runs, allowance for expansion must be made. For corners, the trunking must be mitred and for T-joints it must be slotted for cable entry.

#### Self-adhesive fixing

Decoduct self-fix mini trunking is offered with self-adhesive tape for easier fixing on suitable surfaces. The surface should be flat, clean, dry and free from dust or flaky paint. The backing should be peeled-off not more than 12 cm at a time, to expose the adhesive tape. Ensure the trunking is correctly positioned before pressing on surface as the self adhesive tape is designed to give immediate fixing. For permanence, screws can also be used.

## CABLE MANAGEMENT SYSTEMS

### Perimeter Systems - DADO Trunking

#### Single-core P.V.C. insulated cables in trunking

For each cable it is intended to use, obtain the appropriate factor from Table 1A.

Add all the cable factors so obtained and compare with the factors for trunking given in Table 1B.

The size of trunking which will satisfactorily accommodate the cables is that size having a factor equal to or exceeding the sum of the cable factors.

**TABLE 1A**  
**Cable Factors for trunking**

Type of Conductor	Conductor Cross-sectional area mm <sup>2</sup>	Factor
Solid	1.0	7.1
	2.5	10.2
Stranded	1.5	8.1
	2.5	11.4
	4.0	15.2
	4.0	15.2
	6.0	22.9
	10.0	36.3

**TABLE 1B**  
**Factors for trunking**

Dimensions of Trunking mm x mm		Factor
DXT 1	50 x 50	1037
DXT 2	75 x 50	1555
DXT 3	75 x 75	2371
DXT 4A	100 x 40	2200
DXT 4	100 x 50	2091
DXT 5	100 x 100	4252
DXT 6	100 x 150	4650

#### For other sizes and types of cable or trunking

For sizes and types of cable and sizes of trunking other than those given in Tables 1A and 1B above, the number of cables installed should be such that the resulting space factor does not exceed 45%.

The table below gives the 45% filling factors for Decoduct Maxi-Trunking, based on which the right size of trunking can be selected.

Item Code	Size(mm)	45% Filling Factor(mm2)
DXT 1	50 X 50	940
DXT 2	75 X 50	1700
DXT 3	75 X 75	2450
DXT 4A	100 X 40	2350
DXT 4	100 X 50	2250
DXT 5	100 X 100	4350
DXT 6	100 X 150	4500

# DECODUCT<sup>®</sup>

## CABLE MANAGEMENT SYSTEMS

### Maxi Trunking Systems

#### Safety

To realize the full advantages of the Decoduct system, as well as to ensure safety, its installation, commissioning and maintenance should be undertaken by competent personnel and in accordance with relevant codes of practice and statutory requirements. Information on the installation of Decoduct products to ensure that so far as it is reasonably practicable they are safe and without risk to health when properly used, can be found in:

- Regulations, British Standards specifications and codes of practice
- Regulations for Electrical equipment of buildings (IEE publication)

#### Description

Seven sizes of Decoduct maxi trunking are available, each consisting of a U-channel body, and a specially designed clip-on lid for secure closing. The lid is closed by aligning it with the body, clipping it on one end of the body, and pressing into place along the length of the trunking, applying equal pressure on both sides. Lid removal is simply done by starting at one end and peeling of the lid along the length of the trunking.

#### Fixing

Two widely spaced holes should be drilled on the base of the trunking body at every fixing point. Fixing can be done using screws and fixing points should not be spaced more than one metre apart. The drilled holes should be oversized to allow for expansion, and washers should be used under the heads of screws. Care should be taken not to overtighten the screws.

#### Jointing

A fine toothed tenon saw and mitre block should be used to cut trunking, for accurate clean cuts leading to a neat installation. In all straight joints, it is important to stagger the joints of the trunking body and lid, to give better cable protection and reduce joint visibility. For corners and T-joints, a comprehensive range of Decoduct maxi-trunking fittings is provided, complete with extended lids on all branches, to provide an overlap. The fittings are fitted by removing the lids, drilling holes and using washers and screws, as in the case of trunking. After the cables are laid, the lids of the fittings should be fitted first, before finally fitting the lids on the trunking body.
